

Introduction

This report aims to overview and recommend suitable hardware and software solutions for team members of a new local IT company.

Start-up company Odyssey specializes in making mobile applications for Android and IOS. A variety of applications includes health-tracking utilities, meditations and yoga, workout and weight-loss programs. Odyssey team consists of 1 Project Manager, 2 graphical and UI/UX Designers, 1 Android Developers, 1 Apple Developer, and 1 QA Software Tester. While the company is relatively new and has a limited budget, it still owns a small office in the center of the Tashkent.

Review of hardware, software solutions and tools

Configuration details for computers

First of all, the startup company should acquire proper affordable computer hardware. Taking into consideration a low budget prioritizing laptop over stationary PC for developers, designers and tester would be a better option. Modern laptops are light, comfortable and easy to transfer, therefore team members can work both at the office and distantly. On the other hand, Project manager might spend more time at the office, coordinating and watching employees work, therefore Desktop, in this case, might a great choice. Choosing between Operating System, we focused more on laptops with Windows OS as it is much cheaper compared with Apple production. The suggested screen size would be 13-15 inches with an anti-glare surface. Moving to CPU, we think Intel Core i5/i7 would cover all requirements of developers and designers. Choosing 8GB or more RAM is crucial for allowing users to use several programs simultaneously. Furthermore, even though the SSD storage type can store less but provides faster devise performance than HDD, we provided laptops with both configurations. The company has an office and naturally, electricity supply, Nevertheless, it is important to have 8 hours Battery life, as programming and designing require intensive computing power. It is noteworthy to mention that laptops for designers are more powerful, in terms of graphic card, processor and screen resolution. Regarding software tester, the optimum variant would be to use cloud-based services for application testing and if necessary, laptops as for developers are suggested.

No	Name and Price	OS	Descriptions	Benefits	Limitations
Developers					

1	<p>Acer Aspire E 15</p> <p>Price:</p> <p>599\$</p> <p>(Amazon)</p>	Windows 10 Home 64-bit	<p>Processor: Intel Core i5-8250U 1.6GHz Quad-Core, Turbo Boost up to 3.4 GHz</p> <p>Ram: 8 GB DDR4</p> <p>Storage: 256GB SSD</p> <p>Graphics: NVIDIA GeForce MX150 2GB DDR5 VRAM</p> <p>Display: 15.6-inch Full HD ComfyView LED-Backlit IPS Screen, 1920 x 1080 pixels Resolution</p> <p>Battery life: Up to 15 hours</p> <p>Weight 2.4kg</p>	<p>Low price</p> <p>Strong performance</p> <p>Lots of ports</p> <p>Good battery life</p> <p>Comfortable keyboard</p> <p>Big touchpad</p> <p>Great for Android Studio, Visual Studio or PostgreSQL</p>	<p>Bulky design</p> <p>Filled with bloatware</p>

Laptops as for Developers					

Configuration details for server

No	Name and Price	Description	Benefits	Limitations
1	Dell PowerEdge T30 Price: 469,99\$ (Amazon)	Processor: Intel Xeon E3-1225 v5 Ram: Up to 64GB Storage: 1 TB SATA, up to six SATA HDD Graphics: Intel HD Graphics P530 Bays: Four Connectivity: 10 x USB ports, HDMI, DisplayPort, VGA, serial, PS2, Gigabit Ethernet Dimensions (W x D x H): 17.5 x 43.5 x 36cm	Low price Compact and quiet Upgradable Low energy consumption Fast quad-core Xeon processor Room for six internal disks Fix USB 3.0 slots Perfect alternative to an office workplace	Single Gigabit network port No hot-swapping of disks No Operating System
2	Lenovo ThinkServerT S150 Price: Approximately 500-700\$	Processor: Intel Xeon E3-1200 v6 Ram: Up to 64GB Storage: 1 TB SATA, Up to 40TB HDD Bays: Four Connectivity: 8 x USB 3.0, serial, video, 2 x DisplayPort, audio, Gigabit Ethernet Dimensions (W x D x H):	Upgradable Compact and quiet Low-energy consumption	No hot swapping Slow base CPU

		17.5 x 37.5 x 43cm		
3	Synology DiskStation DS419slim Price: 353,99\$ (newegg)	Processor: Marvell Armada 385 88F6820 dual-core 1.33GHz Ram: 512MB Storage: Up to 20TB Bays: Four Connectivity: USB 3.0 port, two gigabit Ethernet ports that support link aggregation, and a power jack	Fast to setup Low price Mobile apps Up to 200 users Hot swapping Operating system - DiskStation Manager Cloud solution 24-hour backup device Light weight Compact and quiet Low energy consumption Lots of available apps Anywhere access with iOS and Android ready mobile apps	Only uses proprietary apps Drives not included Only accepts 2.5-inch drives Limited storage capacity

Software solutions

On premises oriented

No	Name and	OS/Bro	Descriptions	Benefits	Limitations
----	----------	--------	--------------	----------	-------------

	Price	user support			
Developers (Android)					
1	Android Studio Price: free	Windows, macOS and Linux	Official Integrated Development Environment (IDE) for Android app development, based on IntelliJ IDEA . Powerful code editor and developer tools. Basic requirements: <ul style="list-style-type: none"> • Microsoft Windows 7/8/10 (32-bit or 64-bit) • 3 GB RAM minimum, 8 GB RAM recommended (plus 1 GB for the Android Emulator) • 2 GB of available disk space minimum, 4 GB recommended • 1280 x 800 minimum screen resolution 	Fast and feature-rich emulator Free Android app and library modules Google App Engine modules Built-in cloud solution support for Google cloud platform Inbuilt Android Virtual Device to test Android applications. Open-source software Auto-completion facility	Good for small business Requires high amount of RAM and processing power Difficult multitasking Consumes a lot of memory

2	IntelliJ IDEA Price: free IntelliJ IDEA Ultimate Price: 1st year 499\$, 2nd year 399\$, 3rd year and onwards 299\$	Windows, macOS and Linux	A Java IDE with support for Java 8 and Java EE 7, new tools for Android development, the editor enhancements developed by JetBrains. Basic requirements: <ul style="list-style-type: none"> • 1 GB RAM minimum, 2 GB RAM recommended. • 300 MB hard disk space + at least 1 GB for caches. • 1024 x 768 minimum screen resolution. 	Documentation Free trial Wide range of Tools Good learning experience Great developer communities	Heavy program Difficult for beginners No cloud solutions Expensive
---	---	-----------------------------------	---	---	---

Developers (IOS)

1	XCode 11 Price: free	macOS	Apple's proprietary integrated development environment (IDE) allowing to develop applications for iPad, Mac and Apple Watch. Supports any feature or technology currently available on iOS and iPhone, for which it makes native apps.	Built-in sprite editor Build-in testing "playground" Highly specialized Free Best for IOS applications Version Editor Split windows Powerful interface builder and debugging tools	The Swift coding is complicated Not so much plugins There is much better options only for Mac computers
---	---	-------	---	---	--

2	AppCode Price: Free 30-days Trial Price: 1st year 199\$, 2nd year 159\$, 3rd year and onwards 119\$	macOS	Integrated development environment (IDE) designed by JetBrains for MacOS/iOS development. It allows to build apps for Apple devices. Basic requirements: 2GB RAM (recommended 8GB) 3,5GB of Disk Space (recommended 5GB) 1024 x 768 minimum screen resolution 11.3 Xcode	Fully compatible with Xcode Seamless integration with Git, CocoaPods, Jira and others Support many languages Efficient project navigation Smart completion Reliable refactorings Productive unit testing better code editor	Does not support whole IOS/Mac development cycle No interface designer No UI creation Only for Mac computers Hard debugging Cannot run without Xcode
For development of IOS programs on Windows OS, see section “Hybrid”					
	Git Price: free	Windows, macOS	Distributed source control system that helps software developers to track and manage multiple revisions of the same project	Good Documentations Simple to use Collaboration Fast Synchronizing multiple programmers on the same codebase	Difficult for people who don't use command line Complicated to learn
Designers					

1	<p>Adobe Experience Design XD</p> <p>Price: 552\$ per year</p>	Windows, MacOS, Android, IOS	<p>UX tool for businesses that helps create designs for web and mobile via prototyping, sharing, collaboration, and more.</p> <p>Basic requirements:</p> <p>RAM: 4 GB</p> <p>2GB hard disk space</p> <p>1280 x 800 resolution</p> <p>Intel® or AMD processor with 64-bit support</p>	<p>User-friendly</p> <p>Easy to use and learn</p> <p>Filling UI is simple</p> <p>Available to preview on phones</p>	<p>Lags on android preview</p> <p>Animating UI is complicated</p> <p>No CSS export</p>
2	<p>Balsamiq Wireframes</p> <p>Price: 98\$ per user</p>	Windows, MacOS	<p>Rapid wireframing software that enables lean teams to collaborate, make mockups, control versions, and run user test.</p> <p>Basic requirements:</p> <p>Mac OS X</p> <ul style="list-style-type: none"> • macOS 10.12.6 (macOS Sierra) • 4GB of memory • 100MB disk space (plus space for backups) <p>Windows</p> <ul style="list-style-type: none"> • Windows 7 with SP2 • 4GB of memory • 150MB disk space (plus space for backups) 	<p>User Friendly</p> <p>Fast</p> <p>Designed for Collaboration</p> <p>Integrated with Cloud Drive, Jira</p> <p>Many options</p> <p>Ability to convert a design to a PDF</p> <p>Cloud support</p>	<p>limited UI elements</p> <p>Requires a lot of RAM</p> <p>Limited collaboration options</p> <p>Subjective design</p>

	<p>Axure RP</p> <p>Free 30-days Trial</p> <p>Axure RP 9 Team</p> <p>Price:</p> <p>\$ 49 per user, per month</p>	Windows, macOS	<p>All-in-one software design prototyping tool used by UX designers to plan, prototype and hand off projects to developers, all without code.</p> <p>Basic Requirements:</p> <p>Windows</p> <ul style="list-style-type: none"> • Windows 7, 8, or 10. • 2 GB memory (RAM) minimum, 4 GB recommended. • 1 GHz processor. • 5 GB disk space <p>Mac OS</p> <ul style="list-style-type: none"> • macOS 10.9+ • 2 GB memory (RAM) minimum, 4 GB recommended. • Mac computer with 64-bit Intel processor. • 5 GB disk space. 	<p>Team Project hosting on Cloud</p> <p>Secure</p> <p>Third-Party widgets and Sketch Integration</p> <p>Version Control</p> <p>UI/UX Prototyping</p> <p>Quickly test ideas</p> <p>Great collaboration</p> <p>Revision History</p>	<p>Expensive</p> <p>Large prototype slows performance</p> <p>Hard to learn</p> <p>outdated Interface</p>
3	<p>Sketch</p> <p>Price: 99\$ per year</p>	macOS	<p>Creating, prototyping, collaborating and turning ideas into incredible products with the definitive platform for digital design.</p> <p>Basic Requirements:</p> <ul style="list-style-type: none"> • macOS High Sierra (10.13.4) or newer • 2GB RAM • 1GB disk space 	<p>User-friendly</p> <p>UI and UX is simple</p> <p>Automatic project saving</p>	<p>Only mac support.</p> <p>Occasional crashes when files are big</p> <p>Only English is supported</p>
Project Manager					

1	<p>Alfresco</p> <p>Alfresco Starter Edition</p> <p>Price:</p> <p>Approximately 18.500\$ per year</p>	Windows, MacOS, Linux, iOS, Android	<p>The software is designed to facilitate teamwork on documents stored within the system. As much a content management platform as it is a document management system</p>	<p>Many different tools</p> <p>Fast</p> <p>Document management</p> <p>Collaboration Tools</p> <p>Custom workflow processes</p> <p>Integrations with Google Docs, Microsoft Office etc.</p> <p>Easily extended</p>	<p>Very expensive for small businesses</p> <p>Lack of transparent pricing</p> <p>Not easy to use</p> <p>Bad mobile application</p>
2	<p>Jira</p> <p>Price:</p> <p>10\$ per year</p>	Windows, MacOS, Linux, iOS, Android	<p>Project management solution for mapping out, prioritizing, and delegating tasks.</p> <p>System streamlines the app development process from conceptualization to execution.</p>	<p>Available on different platforms</p> <p>Affordable</p> <p>Different features available</p> <p>Variety of charts and graphs</p> <p>Strong security</p> <p>Customizable dashboards and wallboards</p>	<p>Not user-friendly</p> <p>Slow</p> <p>Good for big companies</p>

3	Microsoft Project Price: 620\$ per year	Windows	Advanced project management platform Great for scheduling projects and finding optimal solutions for distributing workloads across the team.	Built-in reports Easy connection with microsoft office tools Fast start-up Supports detailed task descriptions	Only for windows OS Expensive Only per one PC
---	--	---------	---	---	---

Tester

1	Appium Price: free	Windows, macOS	Appium is an open source test automation framework for use with native, hybrid and mobile web apps. It drives iOS, Android, and Windows apps using the WebDriver protocol.	Web Testing Supports both Android and IOS Open Source Clear UX/UI	Requires a lot of space Slow for IOS Sometimes loses connection to emulator
2	Kobiton Kobiton Team Price: 40\$ per month	macOS	Mobile testing platform that accelerates delivery and testing of mobile apps by offering manual and automated testing on real devices	Supports varieties of devices Not expensive Manual and autonomous testing Appium Script Generation	Only for IOS Sometimes store is not available
3	TestFlight Price: free	IOS mobile app	Mobile application that allows you to instal and beta test apps on your iOS device allowing you to provide feedback to developers on the features you tested in the pre release	User-friendly Minimalistic interface Best app to share the ios apps to clients and	Requires iPhone Only for IOS

				external tester Allows to receive remote logs, crash reports and tester feedback Supported by Apple No need for Tester

Cloud oriented

No	Name and Price	OS/Browser support	Descriptions	Benefits	Limitation
Developers					
1	AWS Amplify Price: Free Tier for 12 month 1000 build minutes per month After - 0.01\$ per build minute Hosting 0.023\$ per	any Browser	Development platform for building secure, scalable mobile and web applications. Amplify covers the complete mobile application development workflow from version control, code testing, to production deployment, and it easily scales with your business from thousands of users to tens of millions. For IOS, Android, React Native	Easy to use Accessible from everywhere Fast and efficient Vast range of services Good UI Secure Web client	No back-up Sometimes lon responses High price

	GB stored per month 0.15\$ per GB served		Platform as a Service (PaaS)		
2	Azure App Service	any browser	This program is described in “Hybrid” section (See section below)		
3	Firebase Crashlytics Price: free	any browser	Powerful tool to track, prioritize, and fix stability issues that erode app quality, in real time. Software as a Service (SaaS)	Quick Real Time alerts Easy for a non-developer Both for Android and IOS	Old UI Connects with other Google programs
Designers					
1	Balsamiq Wireframes Price: 9\$ per month	any Browser	Same program was mentioned in “on premises oriented” (see section above) Software as a Service (SaaS)		Bad performance for non-traditional browsers

2	<p>Figma</p> <p>Price:</p> <p>free</p> <p>for up to 2 editors and 3 projects</p> <p>Figma Professional</p> <p>Price:</p> <p>12\$ per user per month</p>	any Browser	<p>Web-based collaborative wireframing and interface design tool.</p> <p>Software as a Service (SaaS)</p>	<p>Great in real-time collaboration</p> <p>Easy to share projects</p> <p>Easy to learn</p> <p>Many options and elements</p> <p>Great for using a shared library</p>	<p>Not intuitive UI</p> <p>Slow with large projects</p> <p>Limited design tools</p>
3	<p>Marvel</p> <p>Price:</p> <p>free for 1 user, 1 project</p> <p>Marvel Team</p> <p>Price:</p> <p>42\$ per month</p>	any Browser	<p>Web and mobile prototyping software that helps designers collaborate in real time and create interactive hotspots. No coding required.</p> <p>Software as a Service (SaaS)</p>	<p>Great prototyping tool</p> <p>Fast</p> <p>Solid, quality product</p> <p>User-friendly</p> <p>Integration with Sketch</p> <p>Great UI/UX</p> <p>Good customer service</p>	<p>No collaboration with unauthorized users</p> <p>Unauthorized users cannot leave comment on a project</p> <p>Slows when working large projects</p>
Project manager					

1	monday.co m 14-days free trial monday.co m pro Price: 79\$ per year	Windows , macOS, Linux, iOS, Android any browser	One of the market's leading collaboration and communication apps for teams. Syncs all information in a single, accessible hub, and empowers agents and team members to make important decisions together Software as a Service (SaaS)	Ability to see big picture Align goals Easy to use Highly customizable Modern UI Great service support	Only English is available Expensive Unnecessarily confusing pricing and plans. 14-day trial insufficient to learn the app.
2	Trello Price: 10\$ per user per year	any browser, IOS, Android	Collaboration tool that organizes projects into boards Software as a Service (SaaS)	User-friendly Easy to use Email notification tools Great for young start-ups Great filters Affordable	Random usertag names Only 10mb files per attachment

3	<p>Wrike Professional</p> <p>(5-15 users)</p> <p>Price:</p> <p>9.8\$ per month per 1 user</p>	<p>Windows , macOS, Linux, iOS, Android</p> <p>any browser</p>	<p>Online project management and work collaboration platform that enables teams to deliver work with speed and efficiency</p> <p>Software as a Service (SaaS)</p>	<p>Lots of customizability</p> <p>Integrates with Slack, Google Hangouts, and Adobe Creative Cloud</p> <p>Secure</p> <p>Great communication tools</p> <p>Supports many Languages</p> <p>Resource Management</p> <p>Time & Expense Tracking</p> <p>Supports Adobe extension</p> <p>Great service support</p>	<p>Not entirely easy to use</p> <p>No spell check tool built-in</p> <p>Mobile operations are limited</p> <p>Expensive</p> <p>Bad mobile version</p>
---	--	--	---	---	---

Software tester

1	<p>AWS Device Farm</p> <p>Price:</p> <p>0.17\$ per device, per minute</p> <p>Unlimited testing:</p>	<p>any browser</p>	<p>An application testing service that lets you improve the quality of your web and mobile apps by testing them across an extensive range of desktop browsers and real mobile devices</p> <p>Software as a Service</p>	<p>Multiple desktop browsers testers</p> <p>Multiple device testers</p> <p>Secure</p> <p>Both IOS and Android testing</p>	<p>Number of inputs to multiple device is restricted</p> <p>Relatively high cost</p>
---	--	--------------------	--	---	--

	250\$+ per month		(SaaS)		
2	Firebase Test Lab Price: Spark Plan free 10 tests per day 5 tests per day Blaze Plan 1\$ per device, per hour 5\$ per device, per hour	any browsers	Cloud-based infrastructure for testing Android apps Software as a Service (SaaS)	Easy to run Android Studio Integrations Provides test reports include logs, screenshots, and videos Easy to find a crash	Only Android Tied into Google Cloud High potential of data loss (if you occasionally delete code from console)

Cloud-based servers

No	Name and Price	OS/Browser support	Descriptions	Benefits	Limitation
1	Google Cloud Platform Price:	any browser	Google Cloud Platform offers wide range of managed database services across relational and non-relational workloads	Easily Accessible Powerful Lots of features to back up	Hard to setup Requires Documentation for starting up

	1 year free, then 300\$ per year		Infrastructure as a Service (IaaS)		
2	IBM Cloud Price: free, then upgrade and get 200 USD credit	any browser	It allows enterprises of any size to create custom apps and automate infrastructure deployment Software as a Service (SaaS)	Large varieties of products Great security Fast storage capacity	Delayed synchronization File management issues Not user-friendly
